

**Michigan Department of Community Health
Office of Recovery Oriented Systems of Care – Prevention and Treatment Section**

**INSTRUCTIONS FOR YOUTH INSPECTORS
Vending Machine Compliance Checks**

1. Have your parent/guardian sign a permission slip/release for you to participate as a youth inspector in the Synar Survey Project (see attached sample). You must submit this permission slip to the coordinator of this project to be eligible to participate.
2. Complete the training for youth inspectors provided in your area, and discuss the procedures for conducting the compliance check with your adult chaperone to assure that you are both comfortable with the process.
3. Dress as you would normally dress (this includes make-up). Do not attempt to make yourself appear older than you are.
4. When conducting the compliance checks, your team does not want to give the impression of being together, *nor should you announce at any time the purpose of your visit.*
5. Survey the scene and plan your strategy for each outlet that you visit. The chaperone will park first and enter the outlet separately. If the chaperone determines that the outlet has a vending machine, they will exit the outlet and let you know that you may enter. *If the chaperone indicates that the outlet has an admittance policy posted that includes an age restriction that prohibits youth from entering the outlet, do not enter. Please record on the report form that you could not complete the inspection of the outlet because of an age restriction.*
6. Walk up to where the cash register is located in the outlet and ask for change. **Be specific that the change is for the cigarette vending machine (i.e. “Can I get change for your cigarette machine?”).**
7. Be truthful about your age if asked. If asked for identification, provide it. *Identification must include both a picture and birth date.* **Do not use false identification.** Also reply that the tobacco is for you if asked. Act natural, and do not reveal the true reason you are purchasing tobacco.
8. If the clerk refuses to give you change for the vending machine, leave the outlet without argument. Record this as an unsuccessful sale on the data collection form.
9. If you receive change and are not interrupted by the individual responsible for the vending machine as you approach the machine, and deposit one coin, **this transaction is considered a successful sale, a non-consummated buy. Do not complete the transaction by depositing all the coins and purchasing the tobacco product.** Record this as a successful sale on the data collection form. Be sure to note whether the machine has a Youth Tobacco Act sign posted.
10. Your adult chaperone will witness the transaction.

11. When leaving the outlet, don't let the clerk be aware that you and the adult are together.
12. Complete the worksheet after leaving each outlet. Give to the adult chaperone. *Please note that the current Synar survey form has two categories of reasons for why an outlet was not able to be completed: 1) one category was for an outlet that is considered **ineligible**; and 2) the second was for an outlet that was **eligible, but for some legitimate reason the inspection could not be completed.***
13. Do not discuss this compliance check with others until all of the survey visits are completed.
